New Century FS offers our customers many programs when it comes to propane and refined fuels. This allows you to have many choices when purchasing your fuels from us. We offer a contract price, which is a fixed price for a specific amount of gallons for a specified time period. If you choose not to contract, we offer you a competitive price at the time of delivery. Either way, it is your choice to make. If you feel that the price is going to get higher, then a fixed contract price is the way to go. If you feel the price is going to get lower, then you have the option not to contract and take the price at the time of delivery. The choice is yours.

New Century FS as a fuel and propane supplier has the same choices our customers do. We can contract and have a fixed price, or we can choose to take the price at the time the fuel or propane is delivered to us. The contracts and agreements that we make with our suppliers must be signed and the product taken at the price and time specified. We at new Century must honor our commitments to our suppliers by taking delivery, so we must require all of our customers to honor their commitments as well.

Contracting is a good tool to use with the petroleum market being very volatile the last few years. However, customers should use caution when contracting. No one can predict which way the market will go and contracting may not always be the right answer. Contact your local New Century FS Energy specialist to find out about all the programs that are available. Thank you very much for your business.

Sincerely,

Kevin DeGoey
Energy Manager
